**Austin Teeth Whitening Expectations**

Austin Teeth Whitening safely removes stains caused by foods, beverages, tobacco, medicine, and aging. For the ultimate whitening effect on your teeth, you have the options to perform up to 3 whitening sessions at the time.

- When Whitening, you may feel a slight tingling
- Austin teeth whitening products will not damage existing dental work
- Austin teeth whitening products will remove stains from existing dental work but will not whiten them beyond their original color
- White spots may appear more prevalent directly after whitening but the contrast will lessen within 24 hours
- Teeth may feel temporally sensitive; sensitivity is typically minor and gone within the first 24 hours. You may choose to purchase a desensitizing treatment with your whitening.
- Everyone's teeth responds differently and have their own natural "stop" point for whitening results.
- You may experience temporary gum irritation which is more prevalent in clients that have brush embrasures from brushing teeth within the four hours prior to whitening.

**Austin Teeth Whitening Product**

Teeth whitening product offers enamel strengthening qualities. It is organic plant and mineral-based containing no animal by products. Active ingredients is a food grade hydrogen peroxide.

**Recommendations**

To maintain healthy teeth and gums, it is recommended that you visit your dentist on a regular basis if you have allergies or reactions to peroxide or glycerin, teeth whitening is not recommended. If you have diabetes, heart conditions, pregnant, and/or currently breast-feeding you may want to consult with your doctor prior to using the teeth whitening products. Ask your representative for a list of ingredients if you have concerns any existing mouth sores may feel temporary irritation during and/or after teeth whitening.
